

Curriculum Vitae

*** Within 3 pages**

	Name in Full	Kee Wook Jung
	Country	South Korea
	Affiliation	Department of Gastroenterology, Asan Medical Center, University of Ulsan College of Medicine, Seoul, Korea
	Email	jung.keewook30@gmail.com

Educational Background

August 2004-August 2008 Ph.D, Gyeongsang National University, Postgraduate College of Medicine, Gyeongnam, South Korea
 March 1999-August 2001 Master of Internal Medicine, Gyeongsang National University, Postgraduate College of Medicine, Gyeongnam, South Korea
 March 1991-February 1997 Bachelor of Medicine, Gyeongsang National University, College of Medicine, Gyeongnam, South Korea

Professional Career

March 2019-Present Clinical Professor of Gastroenterology, Asan Medical Center, Seoul, South Korea
 September 2012-February 2019 Clinical Associate Professor of Gastroenterology, Asan Medical Center, Seoul, South Korea
 July 2010-August 2012 Clinical Assistant Professor of Gastroenterology, Asan Medical Center
 July 2009-June 2010 Advanced Esophageal Fellow (clinical), Mayo Clinic, Rochester, MN, USA

Research Field

His research interest is neurogastroenterology & motility. Dr. Jung has written numerous articles and book chapters including novel parameters in high-resolution manometry in anorectum and esophagus, behavioral therapy in functional GI disorders, achalasia and eosinophilic esophagitis.

1. Eosinophilic Esophagitis in Asia: Distinct Clinical Phenotypes and Implications for Long-Term Management, J Neurogastroenterol Motil. 2026 in press
2. Focal Hypoganglionosis-Associated Adult-Onset Megacolon: A Localized Enteric Neuropathy Distinct From Chronic Intestinal Pseudo-Obstruction. J Neurogastroenterol Motil. 2026 in press
3. Artificial Intelligence in High-resolution Anorectal Manometry: Current Applications and Future Directions. Curr Gastroenterol Rep. 2026 Oct 2;28(1):33
4. Real-world Application of the International Anorectal Physiology Working Group Standardized Protocol and London Classification: A Multi-country Cross-sectional Survey of Anorectal Manometry Practice in Asia. J Neurogastroenterol Motil. 2026 Apr 30;32(2):267-275
5. Comparison of Clinical Characteristics and Long-term Prognosis of Focal Hypoganglionosis With Adult-onset Megacolon and Chronic Intestinal Pseudo-obstruction. J Neurogastroenterol Motil. 2025 Oct 30;31(4):501-511
6. Assessment of Small Bowel Motility Using Cine-magnetic Resonance Imaging in Patients Suspected With Chronic Intestinal Pseudo-obstruction. J Neurogastroenterol Motil. 2025 Jul 30;31(3):374-383
7. Real-world Application of the Chicago Classification Version 4.0 for Esophageal Manometry: Asian Multicenter Study. J Neurogastroenterol Motil. 2025 Jul 30;31(3):357-365.
8. Validation of Lyon 2.0 Gastroesophageal Reflux Disease Consensus: Limited Clinical Utility of Mean Nocturnal Basal Impedance in Koreans. J Neurogastroenterol Motil. 2025 Jul 30;31(3):340-346
9. Eosinophilic Esophagitis: No Longer a Rarity in Asia-A Growing Concern for Clinicians. Korean J Helicobacter Up Gastrointest Res. 2025 Jun;25(2):96-97.
10. Effects of patient and imaging factors on small bowel motility scores derived from deep learning-based segmentation of cine MRI. Eur Radiol. 2025 Jun 17.
11. When Manometry and Functional Lumen Imaging Probe Disagree: The Current Limitations of the Chicago Classification Version 4.0 and Probable Extended Indications of Functional Lumen Imaging Probe. J Neurogastroenterol Motil. 2025 Jul 30;31(3):304-312.
12. Validation of the London Classification for Rectal Hyposensitivity in an Anorectal Manometry Database of 2540 Patients With Functional Defecatory Disorder J Neurogastroenterol Motil. 2025 Apr 30;31(2):276-284.
13. Overlap Between Gastroesophageal Reflux Disease and Functional Dyspepsia: Do We Need a New Management Paradigm? J Neurogastroenterol Motil. 2025 Apr 30;31(2):129-130.
14. Artificial Intelligence Model for Time Series Classification: Prediction of Delayed Balloon Expulsion Test Using High-Resolution Anorectal Manometry Data and Time-Series Integrated Pressurized Volume. Neurogastroenterol Motil. 2025 Sep;37(9):e70044
15. Additional Diagnostic Yield of the Rapid Drink Challenge in Chicago Classification Version 4.0 Compared With Version 3.0. J Neurogastroenterol Motil. 2024 Oct 30;30(4):453-458.
16. Optimal Diagnostic and Treatment Response Threshold of the Eosinophilic Esophagitis Endoscopic Reference Score: A Single-Center Study of 102 Patients With Eosinophilic Esophagitis. J Neurogastroenterol Motil. 2024 Oct 30;30(4):430-436.
17. Role of endoscopy in eosinophilic esophagitis. Clin Endosc. 2025 Jan;58(1):1-9

18. Retrograde Cricopharyngeus Dysfunction: Inability of Belch Due to Upper Esophageal Sphincter Relaxation Failure. *J Neurogastroenterol Motil.* 2024 Apr 30;30(2):123-124.
19. Dysphagia associated with esophageal wall thickening in patients with nonspecific high-resolution manometry findings: Understanding motility beyond the Chicago classification version 4.0. *Neurogastroenterol Motil.* 2024 Apr;36(4):e14736.
20. Comparison of Diagnosis of Esophageal Motility Disorders by Chicago Classification Versions 3.0 and 4.0. *J Neurogastroenterol Motil.* 2023. 30;29(3):326-334
21. Adult-onset megacolon with focal hypoganglionosis: A detailed phenotyping and prospective cohort study. *Neurogastroenterol Motil.* 2023;35(9):e1463
22. Incidence, Morbidity, and Mortality of Achalasia: A Nationwide, Population-Based Cohort Study in South Korea. *Gut Liver.* 2023. 15;17(6):894-904
23. Predicting Responsiveness to Biofeedback Therapy Using High-resolution Anorectal Manometry With Integrated Pressurized Volume. *J Neurogastroenterol Motil.* 2022 30;28(4):608-617
24. The Clinical Usefulness of Functional Luminal Imaging Probe in Esophageal Dysmotility Disorder. *J Neurogastroenterol Motil.* 2022. 30;28(4):509-511
25. High-resolution impedance manometry for comparing bolus transit between patients with non-obstructive dysphagia and asymptomatic controls. *Neurogastroenterol Motil.* 2022. 23:e14452
26. The Predictive Value of Intraoperative Esophageal Functional Luminal Imaging Probe Panometry in Patients With Achalasia Undergoing Peroral Endoscopic Myotomy: A Single-center Experience. *J Neurogastroenterol Motil.* 2022. 30;28(3):474-482
27. An Asian perspective on irritable bowel syndrome. *Intest Res.* 2023;21(2):189-195
28. A Case of Sprue-like Enteropathy Associated With Valsartan and Irbesartan. *J Neurogastroenterol Motil.* 2022 30;28(2):327-329
29. Long-Term Risks of Parkinson's Disease, Surgery, and Colorectal Cancer in Patients With Slow-Transit Constipation. *Clin Gastroenterol Hepatol.* 2021;19(12):2577-2586
30. Chicago Classification Update (v4.0): Technical review on diagnostic criteria for distal esophageal spasm. *Neurogastroenterol Motil.* 2021;33(5):e14119.
31. New parameter for quantifying bolus transit with high-resolution impedance manometry: A comparison with simultaneous esophagogram *Neurogastroenterol Motil.* 2020;32(7):e13847
32. Esophageal motility disorders on high-resolution manometry: Chicago classification version 4.0© *Neurogastroenterol Motil.* 2021;33(1):e14058.
33. The international anorectal physiology working group (IAPWG) recommendations: Standardized testing protocol and the London classification for disorders of anorectal function. *Neurogastroenterol Motil.* 2020;32(1):e136792.
34. An Increasing Trend of Eosinophilic Esophagitis in Korea and the Clinical Implication of the Biomarkers to Determine Disease Activity and Treatment Response in Eosinophilic Esophagitis *J Neurogastroenterol Motil.* 2019 30;25(4):525-533
35. What Is Appropriate Upper Endoscopic Interval Among Dyspeptic Patients With Previously Normal Endoscopy? A Multicenter Study With Bayesian Change Point Analysis. *J Neurogastroenterol Motil.* 2019 30;25(4):544-550
