

CURRICULUM VITAE

Personal Information		
Title	Pf.	
Name	Ji Hye Min	
Degree	MD, PhD	
Country	South Korea	
Affiliation	Samsung Medical Center, Sungkyunkwan University	
Department	Department of Radiology	
Educational Background		
2002 – 2004	Premedical Course	Chonnam National University
2004 – 2008	M.D.	Chonnam National University
2010 – 2012	Master	Kangwon National University
2016 – 2016.8	PhD	Sungkyunkwan University
Professional Career		
2015 – 2017.1	Clinical Instructor	Department of Radiology Samsung Medical Center, Seoul, Korea
2017.2 – 2019.2	Clinical assistant professor	Department of Radiology Chungnam National University Hospital, Daejeon, Korea
2019.3-	Assistant Professor	Department of Radiology Samsung Medical Center, Seoul, Korea
Research Field		
Imaging diagnosis and prognostic prediction of hepatobiliary and pancreatic diseases		
Main Scientific Publications		
□ Choi, S.-Y., Min, J. H., Kim, J. H., Park, H. J., Kim, Y.-Y., Han, Y. E., Bae, S. H., Lee, J. H., Choi, Y.-H., & Moon, J. E. (2023). Interobserver variability and diagnostic performance in predicting malignancy of pancreatic intraductal papillary mucinous neoplasm with MRI. <i>Radiology</i>, 308(1), e222463. □ Lee, J. H., Shin, J., Min, J. H., Jeong, W. K., Kim, H., Choi, S.-Y., Lee, J., Hong, S., & Kim, K. (2024). Preoperative prediction of early recurrence in resectable pancreatic cancer integrating clinical, radiologic, and CT radiomics features. <i>Cancer Imaging</i>, 24(1), 6. □ Yang, E., Kim, J.-H., Min, J. H., Jeong, W. K., Hwang, J. A., Lee, J. H., Shin, J., Kim, H., Lee, S. E., & Baek, S.-Y. (2024). nnU-Net-based pancreas segmentation and volume measurement on CT imaging in patients with pancreatic cancer. <i>Academic Radiology</i>. □ Kim, J. E., Kim, H., Kim, B., Chung, H. G., Chung, H. H., Kim, K. M., Kim, S. H., Jeong, W. K., Kim, Y. K., & Min, J. H. (2023). Comprehensive immunoprofile analysis of prognostic markers in pancreaticobiliary tract cancers. <i>Cancer Medicine</i>, 12(7), 7748–7761. □ Song, C., Min, J. H., Jeong, W. K., Kim, S. H., Heo, J. S., Han, I. W., Shin, S. H., Yoon, S. J., Choi, S.-Y., & Moon, S. (2023). Use of individualized 3D-printed models of pancreatic cancer to improve surgeons' anatomic understanding and surgical planning. <i>European Radiology</i>, 33(11), 7646–7655. □ Seo, Y., Min, J. H., Kim, S. H., Kim, Y. K., Kim, H., Cha, D. I., Lee, J. H., Heo, J. S., Han, I. W., & Shin, S. H. (2023). The role of subspecialized radiologist reviews in preoperative conference for hepato-pancreato-biliary disease. <i>European Journal</i>		

of Radiology, 169, 111183.

□ Lim, C. Y., Min, J. H., Hwang, J. A., Choi, S.-Y., & Ko, S. E. (2022). Assessment of main pancreatic duct cutoff with dilatation, but without visible pancreatic focal lesion on MDCT: a novel diagnostic approach for malignant stricture using a CT-based nomogram.

European Radiology, 32(12), 8285–8295.

□ Min, J. H., Kim, Y. K., Kim, S. K., Kim, H., & Ahn, S. (2021). Intraductal papillary mucinous neoplasm of the pancreas: diagnostic performance of the 2017 international consensus guidelines using CT and MRI.

European Radiology, 31, 4774–4784.

□ Yoo, J., Min, J. H., Lee, D. H., Hur, B. Y., Kim, S. W., & Kim, E. (2021). Abbreviated magnetic resonance imaging with breath-hold three-dimensional magnetic resonance cholangiopancreatography: assessment of malignant risk of pancreatic intraductal papillary mucinous neoplasm.

Journal of Magnetic Resonance Imaging, 54(4), 1177–1186.

□ Min, J. H., Kim, Y. K., Kim, H., Cha, D. I., & Ahn, S. (2020). Prognosis of resected intraductal papillary mucinous neoplasm of the pancreas: using revised 2017 international consensus guidelines.

Abdominal Radiology, 45, 4290–4301.
