Speaker : Leehi Joo

Affiliation : Chung-Ang University Hospital, Chung-Ang University College of Medicine, Seoul, Republic of Korea, Department of Radiology

Specialty : Head & Neck

Lecture Title : US Evaluation of Salivary Gland Lesions

PT_No. : CC05-S1

US Evaluation of Salivary Gland Lesions This lecture focuses on ultrasound evaluation of the major salivary glands. We begin with a review of normal anatomy and sonographic appearance — key landmarks, echogenicity, and duct visualization. The second part covers pathology in two categories: infectious/inflammatory conditions, including sialadenitis, sialolithiasis, and Sjögren's syndrome, followed by neoplasms, ranging from common benign tumors such as pleomorphic adenoma and Warthin tumor to malignancies. Through case-based examples, we will look at the typical US findings of each condition and learn about these diseases along the way.
